

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: appellants well reasoned arguments are convincing and the finality of the rejection has been removed and the claims are allowable.

The rejected claims are allowable, because none of the prior art of record would fairly disclose the electrochemical conversion system, which converts the dissolved oxygen to water and removing the water from the fuel cell.

- a. The Reznik patent discloses the reduction of the redox potential, however, it is not apparent that the redox potential reduction is the conversion of dissolved oxygen to water, since the reference does not remove any water from the fuel. Accordingly, the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
